Smart Dimmer Switch
Smart Fan Switch
User Manual

P/N:67210807-LF2602

This manual is applies to smart dimmer switches or smart fan switches.

This manual is for reference only. The specific parameters and functions of the product may be different. Please refer to the received product.

Warning

1. Make sure you have totally cut off the power supply for the switch you are replacing.
2. Do not install the switch with wet hands or when standing on wet surfaces.
3. Do not use beyond maximum load.

Installation

As shown in the wiring diagrams below, insert wires into the corresponding terminal holes and fasten them. Then, take down the panel, use two screws to fix the switch into the wall box and cover the panel.

The wiring diagrams in this manual are for reference only. For different models, the terminal positions may not be same，follow the sign on the product to connect the wires. Meanwhile，The color of the lines in diagrams are used only for discrimination，it do not represent actual colors.

Add Device to APP

1, Download the Smart Life APP: Scan the following QR Code or search "**Smart Life**" in APP Store or Google Play.

Smart Life
Formal version

2, Preparations before started：
● For WiFi switches：
A networkable WiFi router is required, besides，the WiFi switches only supports 2.4GHz WiFi networks.
● For ZigBee/Bluetooth switches：
A ZigBee or Bluetooth gateway is required, and it should be successfully configured before adding the switches.

3, Please confirm that the switch has been properly installed according to the wiring diagram. Power up the switch, then press and hold the button （for about 5~10 seconds）until the wireless LED blinks to enter into pairing mode.

4, Open the APP "**Smart Life**", home page, tap the icon "**+**" on the top right into add manually. then Tap **Electrical>>Switch** （Select the appropriate switch type），Operate according to APP interface prompts.
For ZigBee / Bluetooth switches, you can also enter into the ZigBee / Bluetooth gateway interface and select "**Add subdevice**" to add.
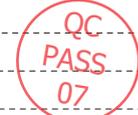

5, **Smart operation of device：** In the APP interface, click "**Scene**" or "**Smart**" at the bottom, then select the "**Tap-to-Run**" or "**Automation**" options, then follow the instructions inside to make smart Settings for the device.

Connect with Voice Services

Refer to the guidence in APP:
Home page>>Me>>Third-Party Voice Services

Click the corresponding smart speaker icon and follow the instructions to configure the corresponding device.
